ELK RIVER ROCK & BOULDERS

Create a natural landscape feel using these beautiful, locally mined rocks. Our Elk River rock has a variety of color in it, enhancing the look of all types of plantings. We offer sizes from 2" for drainage to 24" that can be used to create boulder walls.

Our exclusive 2-4" River Rock is consistent in size throughout the load. It's the ideal rock for around buildings and driveways. It does not wash away in rain storms, or move when blowing leaves away.

Our river rocks are priced according to size and are used for erosion control, landscaping, retaining walls, creek bed lining and decorative ponds. We also carry professional-grade rip rap ranging in sizes from 2" to 24".

WASHED & SCREENED AGGREGATES

Customers count on product consistency. Our washed and screened aggregates are suited for everything from drain tile to roof ballast. Plaisted trucks deliver to your site, or you can come in and we'll load up your truck.

- 3/8" - 1/2" - 3/4" Pipe Bedding Rock (round)
- 3/8" Buckshot (pea gravel)
- 3/4" River Rock (round)
- 3/4" Rock & Sand Mix; 3/4" CA-50 Crushed Granite (2D2 Spec)
- 1-1/2" Roof Ballast & Sewer Rock (round); 1-1/2" CA-1 Crushed Granite
- 2" Crushed Granite Construction Entryway Rock—*Used as a buffer from the construction site to the local roadways to keep construction materials off of the road*
- #7 Roof Rock (round)
- MN DOT Aggregates: Coarse filter 3149.2H; Medium filter 3149.J1; Fine filter 3149.J2
- Red Ball Diamond Aggregate
- Shoreline Filter Rock MN DOT 3601

ROAD BASE MATERIALS

We make our own Class 5 and Recycled Concrete at our Elk River facility. Our quality base products are available in a variety of colors and product choices to meet your specification and pocketbook. All road and driveway base materials are considered compactable materials and will make a firm driving surface for a range of applications, from cart paths to road construction base.

- Crushed Construction Entry Rock – *Buffers job site soils from going onto the street*
- UPM Asphalt Patch – *Used as a premium asphalt patch material*
- 1/2" with Fines Granite
- 3/8" with Fines River Rock or with Fines Red Limestone
- Class 2 Granite; Buff Limestone; Red Limestone
- Class 5 Gravel
- Recycled Crushed Asphalt
- Recycled Concrete

Our 3/4" round river rock meets residential radon mitigation requirements, Section AF103.2 of the Minnesota Residential Energy Code.

SHORELINE RESTORATION ROCK
Use to stabilize shoreline erosion—meets MN DOT 3601-2 Specification.

WASHED PEA GRAVEL – BUCKSHOT

Versatile, affordable and naturally beautiful. Pea gravel is resilient to the elements and allows water to slip by and soak into the ground. It can also be easily paired with other stones and landscaping features to add visual interest to any property. Popular applications include:

- Drain systems and backfill—slows down rushing water
- Playground and dog runs—better for overall sanitation, no mess, no weeds
- Natural looking fire ring and enchanting garden landscaping
- Inviting walkways and low maintenance driveways

New

IRON-ENHANCED SAND & MIXES

An innovation in stormwater runoff treatment. This mix of C-33 Concrete Sand and 5% Iron Filings captures an average 88% phosphate for at least 200 m of treated depth. It offers high pollutant removal rates, is good for nutrient impaired water, can be used as a retrofit for existing areas, and is suitable for cold climates. Plaisted Companies is the local producer of this mix. For information on how to use iron-enhanced sand, visit www.pca.state.mn.us.

HEATED & DRY SANDS

To ensure that you can get dry sand when you need it, Plaisted has built a dry sand storage bin system that holds multiple types of sand. Contractors find our dry mason and concrete sands easy to work with. Heated sand allows for construction to continue during cold weather. We carry these sands:

- Heated #7 Roof Rock (1/2")
- Heated Concrete
- Heated Fill Sand
- Heated Mason Sand

SALT/SAND PRODUCTS

In our region, winter road de-icing is critical. Plaisted Salt/Sand Mixes are mechanically blended and screened to ensure consistency—one reason they're chosen by the Minnesota Department of Transportation. We can custom blend to meet your requirements.

- Ice Control Sand—A washed, coarse sand that will not tunnel over augers; always free flowing
- 10% Salt/Sand Mix; 20% Salt/Sand Mix
- Road Salt

Plaisted Construction Sands

Mason Sand—*for work or play*

Used for mortar on concrete blocks and bricks and for sandblasting, or for volleyball courts and sandboxes.

Concrete Sand

Used to make concrete (coarser than mason sand).

Coarse Sand

Ideal for areas needing drainage.

Fill Sand

Good backfill material to raise an area inexpensively.

Gray Paver Granite Sand

Finely textured and easily compacts to form a firm, smooth surface.

Sand Bagging Sand

Used to fill bags for flood prevention

Quality materials, readily available.

Our Elk River mining reserve supplies the finest quality construction sands and maintenance products in the region. Our trucks will deliver to your site, or you can come in and we will load you up.

We carry 8 varieties of landscape mulch that add a clean finishing touch to landscape projects. Natural wood base mulches provide protection against the cold and the heat of our seasons. It's also great for water retention. Or select from 11 varieties of landscape rock, including: granite, quartz, limestone, slate trap and Minnesota mahogany.

Consistent quality. Reliable delivery.

Ongoing research and development, and our team of market specialists are behind our continued growth. They can help you determine the best products for your application.

Our experienced drivers, fleet of 45 trucks, and our GPS locator help set the standard for the most responsive delivery system in the 5-state area.

Our Pledge

Customer satisfaction or we'll make it right.
