

Plaisted's Dry Sand

Ready to use, no waiting

To ensure that you can get dry sand when you need it, Plaisted has built a **Dry Sand Storage Bin System** that holds multiple types of sand. We can deliver it to you, or we'll load your truck.

For golf and turf applications, dry sand is faster and easier to spread – no more waiting for the sand to cool down prior to using it. Plus, dry sand works into the ground better and is recommended for sand injecting equipment.

Contractors find our dry mason and concrete sands easy to work with as well.

Consistent quality, reliable delivery.

Our four-bin *Accublender*[™] is used to create these mixes. It features a computerized blender with an on-board screen deck that removes oversized particles and a mechanical paddle wheel that ensures uniformity. It automatically adjusts for flow rates of material and stops the conveyor belt when feed bins need to be replenished.

Our Pledge

We deliver on our promise or we will make it right.
