

Plaisted MN DOT Soil Mixes

Certified soil mixes, precisely blended.

Plaisted MN DOT Soil Mixes are composed of silt, clay, topsoil, and Minnesota-harvested peat or compost. All of our mixes are blended by our computerized *Accublender*[™] and independently tested and certified to meet project requirements.

- MN DOT 3877-1A Common Topsoil Borrow**—A general use, turf growing medium.
- MN DOT 3877-2B Loam Topsoil Borrow**—A plant growing medium for designated areas such as landscape beds.
- MN DOT 3877-3C Sandy Clay Topsoil Borrow**—Used as a plant growing medium in critical areas and for topdressing erosion stabilization mats.
- MN DOT 3877-E Rooting Topsoil Borrow**—For vegetative plant restoration and preservation, or as a plant growing medium for rooting, water quality and infiltration.
- MN DOT 3877-F Boulevard Topsoil Borrow**—Structural soil for plant establishment in streetscape boulevards.
- MN DOT 3877-G Filter Topsoil Borrow**—Use to enhance water quality, or as a plant growing medium, or filtration medium.
- MN DOT 3877-H Organic Topsoil Borrow**—Use as a plant growing medium to enhance existing soils.

Consistent quality, reliable delivery.

Our four-bin *Accublender*[™] is used to create these mixes. It features a computerized blender with an on-board screen deck that removes oversized particles and a mechanical paddle wheel that ensures uniformity. It automatically adjusts for flow rates of material and stops the conveyor belt when feed bins need to be replenished.

Our Guarantee

We deliver on our promise, or make it right.
