PLAISTED GREENHOUSE MIX

The perfect blend for growing annuals, perennials and vegetables. Consists of peat, composted pine bark, yard compost, perlite, lime and 5-6 month slow release fertilizer.

- Requires less watering and reduces labor cost
- Composted pine bark creates airspace for optimum root development
- Engineered blend retains nutrients for better growth
- Blended with our Computerized Accublender™ to assure consistent product, load after load

Ideal for: Greenhouse Growers

Availability: Bulk, 2 cu. ft poly bags (50 bags/pallet), or 2.75 cu. yd (74 cu. ft) tote bags

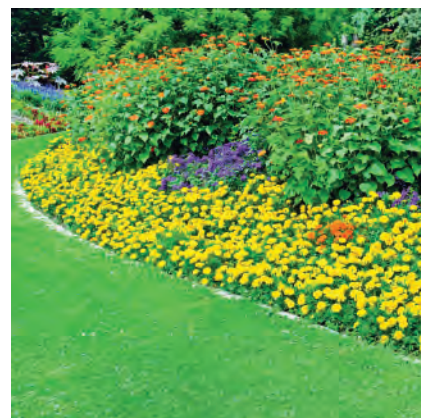

PLAISTED PREMIUM GARDEN MIX

Infused with additional organic matter, it's ideal as a stand-alone or as a blend to enhance existing soil. Consists of soil, peat, yard compost and sand.

- Premium screening technology for unmatched soil uniformity
- Highest measured levels of soil fertility for growth
- Porosity of blend retains nutrients for increased growth
- Addition of coarse sand improves drainage for accelerated germination

Ideal for: Landscapers and Homeowners

Availability: Bulk

PLAISTED GROWERS MIX

Plaisted Growers Mix is used to grow trees and shrubs in containers. Consists of composted pine bark, peat and sand.

- A soilless blend, that is lighter, and water will get to the root system faster than using soil
- Blended with our Computerized Accublender™ to assure consistent product, load after load

Ideal for: Nursery Growers

Availability: Bulk, 45 cu. yd maximum per truckload

PLAISTED TOTAL GARDEN BLEND

Gardening just got easier. Our exclusive soilless, premium blend requires no mixing, no tilling, and virtually no maintenance. Just pour, grow and see amazing results in just weeks. Consists of mostly peat, composted pine bark, yard compost, perlite, lime, and 5-6 months slow release fertilizer.

- Soilless blend requires no tilling and almost no weeding
- Special blend reduces watering for rapid and better growth
- Enhanced with time-release fertilizer for rapid growth
- Blended with our Computerized Accublender™ to assure consistent product, load after load

Ideal for: Raised Gardens

Availability: Bulk, 1.5 cu. ft poly bags (65 bags/pallet)

PLAISTED HEMP GROWING MIX

Hemp growing blend that produces the largest, and highest quality flowers. Consists of peat, composted pine bark, yard compost, perlite, lime and 5-6 month slow release fertilizer.

- Soilless blend requires no tilling, minimal weeding, and reduces watering
- Time-release fertilizer for rapid growth
- Exclusive blend requires no soil amendments and minimal maintenance
- Blended with our Computerized Accublender™ to assure consistent product, load after load

Ideal for: Greenhouse Growers & Containers

Availability: Bulk or 2.75 cu. yds (74 cu. ft) tote bags

PLAISTED PULVERIZED BLACK DIRT

Pulverized and screened, making it easy to work with. Use for lawn, garden and planting applications.

- Improves drainage and reduces root disease in heavy clay soils
- Increases porosity for enhanced growth development
- Improves water and nutrient retention in sandy soils resulting in reduced costs.

Ideal for: Landscapers & Homeowners

Availability: Bulk

PLAISTED ORGANIC YARD COMPOST

Adding organic matter helps improve the quality of the soil, mix or garden. Consists of composted yard waste: leaves, grass clippings, and wood chips.

- Provides key rich nutrients for better, healthier growth
- Improves organic content
- Increases beneficial microbial activity in the lawn to help keep it lush
- Is used as a soil conditioner

Ideal for: Gardens & Lawns

Availability: Bulk

PLAISTED LANDSCAPE MULCH

We carry eight varieties and colors, plus playground chips.

- Insulates the soil helping to provide a buffer from heat and cold temperatures
- Retains water helping to keep roots moist
- Prevents soil compaction
- Helps prevent weeds

Ideal for: Landscapers & Homeowners

Availability: Bulk
