WE ARE
SOIL EXPERTS

HIGH PERFORMANCE SAND-PEAT ATHLETIC MIXES

Plaisted Companies provides the best, when the best is required! That's why our athletic field mixes have been trusted by everyone from the Minnesota Vikings, Minnesota Twins and Minnesota United, to local schools and municipalities.

Proper turf selection for the local conditions is key to long-term field performance. Engineered soils offer a drainage systems equivalent to the rock base found under synthetic turf. Plus, the soil filters contaminants better and allows storm water to be recaptured and reused for irrigation.

- **High Performance Sand-Peat** A reliable field mix (ASTM F-2396)
- **Blended Sand-Peat Rootzone mix** Engineered to promote internal drainage and to remove excess water out of the rootzone
- **Engineered Sand** Layered to match the rootzone sand mix
- **Engineered Gravel** Bridges the sand and mix

ATHLETIC FIELD TOPDRESSINGS

Our topdressing sand spreads easily, providing compaction resistance and improved drainage. Regular application helps maintain an optimal playing surface by enhancing aeration and supporting turf health. We are able to custom blend mixes using our computerized Accublender™ technology.

ATHLETIC CONSTRUCTION SANDS & AGGREGATES

Our construction sand is a versatile and essential material used in the development and maintenance of sports fields. It is carefully processed to meet specific size, texture, and drainage requirements, ensuring optimal performance for various athletic applications.

Our quality aggregates play a crucial role in the construction of sports fields, ensuring structural stability, drainage, and a solid foundation for the playing surface. These materials include gravel, pea rock, or a custom mix based on the native soil conditions.

CU-STRUCTURAL SOIL ®

We don't just stop at the providing high quality materials for the playing surfaces. We have everything you need for the all of the surrounding paths, walkways, parking lots and more. Plaisted Companies is the 5-State area's licensed supplier of CU-Structural Soil. Developed by Cornell University, this patented soil blend provides tree roots a better environment, encouraging growth with an improved soil porosity matrix. It's designed for use where soil compaction is imminent such as under sidewalks, parking lots, medians and low-access roads. It's excellent for growing trees in an urban concrete environment.

HORTICULTURE PRODUCTS

For your outdoor green spaces, we offer a variety of horticulture mixes that help promote better plant survival and growth with less maintenance. Our custom blended mixes are trusted in nurseries and greenhouses all over the state and have yielded record setting results. They effectively collect water from pervious and impervious surfaces while filtering out sediment and pollutants.

We also offer soil amendments that can be mixed with existing soils, turning hard compact clay into loose soil so roots can grow. For sandy environments, we add a screened soil to slow water from running through the sand.

LANDSCAPE MULCH, ROCK & BOULDERS

We carry 9 varieties of landscape mulch that add a clean finishing touch to landscape projects. Natural wood base mulches provide protection against the cold and the heat of our seasons. They are also great for water retention.

Select from 12 varieties of landscape rock, including: river rock, granite, quartz, limestone, slate trap rock and Minnesota mahogany. We also have a fantastic selection of locally sourced boulders, which can act as retaining walls, or stand alone feature pieces. We have a variety of sizes, shapes and textures to meet any application.

PLAISTED ACCUBLENDER™

In sports, the difference between victory and defeat can come down to inches. The pursuit of precision is what elevates organizations to the top. Plaisted Companies adheres to the same philosophy, and incorporates cutting edge technology to assure we uphold our commitment to excellence. Our mixes are all obtained with our Accublander. Each ingredient is put into a separate bin, then they are precisely fed onto the Accublander belt, layering one on top of the other in exact percentages, controlled with an Ipad. As they fall through special screens and paddles, the ingredients are blended together, creating a consistent product load after load.

The 4 bin Accublander can blend up to four components and has an optional fertilizer bin. It precisely blends up to 2,500 tons of material a day.

We also have a 2 bin Accublander that is portable and can be brought on to your job site. This is ideal for locations where acceptable materials are available to blend and this is sufficient space.

DELIVERY

Plaisted Companies offers some of the finest and most reliable delivery options around. Our experienced drivers operate over 50 trucks, designed to best meet your needs.

GPS locators help us set the standard for the most responsive delivery system in the 5-State area.

We consistently get rave reviews about the professionalism of our staff and the positive interactions with them.

OUR PLEDGE

We take tremendous pride in our core values, which ultimately reflect our commitment to excellence.
