

# SAND & AGGREGATES

**WE ARE  
SOIL EXPERTS**

## BOULDERS

We offer an impressive selection of natural boulders to enhance any outdoor space with timeless beauty and rugged durability. Whether you use them as a stand alone focal feature or to provide the functionality of a retaining wall or garden bed border, we have the sizes, shapes and colors to meet your needs. We offer locally sourced fieldstone, in addition to granite, limestone, gneiss and other specialty materials. We also carry professional grade rip rap ranging in size from 2" to 24".

## WASHED & SCREENED AGGREGATES

Customers count on product consistency. Our washed and screened aggregates are suited for everything from drain tile to roof ballast. Plastered trucks deliver to your site, or you can come in and we'll load up your truck.

- 3/8", 1/2", 3/8" Pipe Bedding Rock (round)
- 3/8" Buckshot (pea gravel)
- 3/4" River rock (round)
- 3/4" Rock & Sand mix; 3/4" CA-50 Crushed Granite (2D2 spec)
- 1-1/2" Roof Ballast & Sewer Rock (round); 1-1/2" CA-1 Crushed Granite
- 2" Crushed Granite Construction Entry Rock"
- #7 Roof Rock (round)
- MN DOT Aggregates; Course Filter 3149.2H; Medium Filter 3149.J1; Fine Filter 3149.J2
- Red Ball Diamond Aggregate
- Shoreline Filter Rock MN DOT 3601

## ROAD BASE MATERIALS

We make our own Class 5 and Recycled Concrete at our Elk River facility. Our quality base products are available in a variety of colors and product choices to meet your specification and budget. All road and driveway base materials are considered compactable materials and will make a firm driving surface for a range of applications, from cart paths to road construction base.

- Crushed Construction Entry Rock
- 1/2" with Fines Granite
- 3/8" with Fines River Rock or with Fines Red Limestone
- Class 2 Granite; Buff Limestone; Red Limestone
- Class 5 Gravel
- Recycled Crushed Asphalt
- Recycled Concrete

## CONSTRUCTION SANDS

- **Mason Sand** A great versatile sand used for work or play. Mason sand is used for mortar on concrete blocks and bricks and for sandblasting. It's also great for volleyball courts and sandboxes.
- **Concrete Sand** This sand is more coarse than mason sand and is used to make concrete
- **Coarse Sand** This is a sand that is ideal for areas that need drainage.
- **Fill Sand** This sand is a great material for backfill, to help raise an area inexpensively.
- **Paver Granite Sand** This sand is finely textured and easily compacts to form a firm, smooth surface.
- **Sand Bagging Sand** This is a great inexpensive sand used to fill bags for flood prevention.

## HEATED & DRY SANDS

To ensure that you can get dry sand when you need it, Plaisted has built a dry sand storage bin systems that holds multiple types of sand. Contractors find our dry mason and concrete sand easy to work with. Heated sand allows for construction to continue during cold weather.

## IRON-ENHANCED SAND & MIXES

This mix of C-33 Concrete Sand and 5% iron filings captures an average of 88% phosphate for at least 200 meters of treated depth. It offers high pollutant removal rates, is good for nutrient impaired water.

## SALT/SAND PRODUCTS

Our sat/sand mixes are mechanically blended to ensure consistency. We can custom blend to meet your requirements.

- Ice Control Sand - A washed coarse sand that will not tunnel over augers.
- 10% - 20% Salt/Sand
- Road Salt

## PLAISTED ACCUBLENDER™

In sports, the difference between victory and defeat can come down to inches. The pursuit of precision is what elevates organizations to the top. Plaisted Companies adheres to the same philosophy, and incorporates cutting edge technology to assure we uphold our commitment to excellence. Our mixes are all obtained with our Accublander. Each ingredient is put into a separate bin, then they are precisely fed onto the Accublander belt, layering one on top of the other in exact percentages, controlled with an Ipad. As they fall through special screens and paddles, the ingredients are blended together, creating a consistent product load after load.

The 4 bin Accublander can blend up to four components and has an optional fertilizer bin. It precisely blends up to 2,500 tons of material a day.

We also have a 2 bin Accublander that is portable and can be brought on to your job site. This is ideal for locations where acceptable materials are available to blend and this is sufficient space.

## DELIVERY

Plaisted Companies offers some of the finest and most reliable delivery options around. Our experienced drivers operate over 50 trucks, designed to best meet your needs.

GPS locators help us set the standard for the most responsive delivery system in the 5-State area.

We consistently get rave reviews about the professionalism of our staff and the positive interactions with them.

## OUR PLEDGE

We take tremendous pride in our core values, which ultimately reflect our commitment to excellence.
