

# TOTAL GARDEN BLEND

## A SIMPLER WAY TO GARDEN!

Our MN sourced, soil-less, premium blend requires no mixing, no tilling, and virtually no maintenance. Just pour, grow and see amazing results in just weeks. It consists of mostly peat, composted pine bark, yard compost, perlite, lime, and 5-6 months of slow release fertilizer.

Total Garden Blend has a pH value of around 6.0 which is the preference of professional greenhouses and growers. Horticulture experts rave about the blend, citing it as possessing all of the vital components for optimal growing.

One of those experts is Anoka, MN's Travis Gienger, who set the WORLD RECORD for the largest pumpkin EVER grown. Travis uses and endorses Total Garden Blend as part of his growing formula.
